<https://github.com/AbubakarLodhi>

Summary

Software Engineer and Full Stack Developer experienced in building scalable web applications using Laravel, PHP, React.js, Next.js, and TypeScript. Skilled in frontend and backend development, REST API integration, responsive application design, debugging, performance optimization, and deployment. Hands-on experience developing AI-powered applications, chatbots, automation workflows, and ML/DL models, with a strong focus on building reliable, maintainable, and user-focused software solutions.

Experience

Full Stack Web Developer Intern, WeRQA

April 2026 – July 2026

- Developed and maintained full-stack software applications using Laravel, PHP, React.js, and Next.js, contributing across frontend, backend, API, and database layers.
- Designed and implemented responsive, scalable, and maintainable application features, integrating frontend components with backend services, REST APIs, and databases.
- Implemented new features, debugged and resolved functional and system-level issues, and optimized application performance to improve reliability, maintainability, and user experience.

Software Engineer | Full Stack Developer, WeRQA

July 2026 – Present

- Develop and maintain full-stack software applications using Laravel, PHP, React.js, and Next.js, contributing across frontend, backend, API, and database layers.
- Design and implement responsive, reusable, and maintainable application components while integrating frontend systems with backend services and REST APIs.
- Debug and resolve application and production issues, optimize performance, and improve system reliability while delivering features based on project requirements.
- Contribute throughout the software development lifecycle, including development, testing, debugging, deployment, and maintenance of reliable and scalable applications.

Projects

CRM

github.com/CRM/repo

- Built and deployed a full-stack CRM/POS using Laravel 12, Filament, and MySQL with merchant/staff panels, authentication, invoicing, reporting, and demo accounts.
- Resolved production login and session issues and improved deployment reliability on live hosting.
- Designed reusable application components and integrated frontend, backend, and database functionality for a maintainable business workflow.
- Stack Used: PHP, JavaScript, SQL, HTML, CSS | Laravel, Filament, Livewire, MySQL, Tailwind CSS, Vite

Prism — AI Creative Studio

github.com/prism/repo

- Built a full-stack AI creative studio using Next.js and TypeScript for image, video, and prompt generation, with project workspaces, authentication, and an AI co-pilot chatbot.
- Designed the application around reusable components and AI-powered workflows for generating and managing creative content.
- Stack Used: TypeScript, Next.js, React, Tailwind CSS

App Lens

github.com/app-lens/repo

- Built an automated web QA and testing tool that detects UI issues, broken links, console errors, and accessibility problems across websites.
- Automated test-case generation, screenshot and recording capture, and report generation to streamline website quality assurance workflows.

- Built the system with React, Node.js, and Puppeteer, with Electron support for full-site automation without browser CORS limitations.
- Stack Used: Vite, React, TypeScript, Express, Node.js, Electron, Puppeteer

WeRQA (Website)

- Contributed to the platform's stability and visual flow by conducting comprehensive testing and implementing precise code fixes for the homepage animations and the "Team" section.
- Stack Used: HTML, CSS

Chest Xray

github.com/Chest-Xray-Project-Deep-Learning/repo

- Developed a deep learning-based system using Python to detect pneumonia from chest X-ray images. Implemented DenseNet and EfficientNet-B0 models to classify images as Normal or Pneumonia, achieving high accuracy and reliable performance through advanced feature extraction and model optimization techniques.
- Stack Used: Python

Education

University of Management and Technology, BS in Computer Science 2022 - 2026

- **Coursework:** Programming Fundamental, Object Oriented Programming, Data Structure Algorithm, Database, Operating System, Artificial Intelligence, Deep Learning, Machine Learning

Technologies

Languages: C++, Python, JavaScript, TypeScript, PHP, SQL, HTML, CSS

Frontend: React.js, Next.js, Vite, Tailwind CSS, Framer Motion, GSAP, Three.js

Backend & APIs: Node.js, Express.js, Laravel, Django, Django REST Framework, Livewire

Databases: PostgreSQL, MySQL

AI & Automation: AI-Assisted Development, Chatbots, Machine Learning, Deep Learning, YOLO, OpenCV, MediaPipe, Puppeteer

AI Tools: GitHub Copilot, Cursor, Claude

Deployment: Git, GitHub, Vercel, cPanel
